Technical Information

|                       |                                                      |                   |
|-----------------------|------------------------------------------------------|-------------------|
| IP Waterproof Rating  | IPX6 front & back                                    |                   |
| Input Voltage         | 10-30V DC (12/24V System)                            |                   |
| Input Current Max     | 2A                                                   |                   |
| Output Power*         | 5W/7.5W/10W/15W                                      |                   |
| Average Standby Power | Input Voltage (V)                                    | Standby Power (W) |
|                       | 12                                                   | 0.2W              |
|                       | 24                                                   | 0.3W              |
| Certification         | Qi, CE, FCC, ROHS, C-Tick, UN ECE R10, PSE Certified |                   |

\*Output power dependant on phone model
